Custom Food Delivery Mobile Application

Android + iOS customer apps, delivery-partner workflow, restaurant operations and admin controls

PREPARED FOR
Client / Business Name

PREPARED BY
Your Company / Name

PROPOSAL DATE
14 August 2026

VALIDITY
30 days from proposal date

YEAR 1 PROJECT INVESTMENT: ₹10,00,000 + applicable GST

Full source-code and business-asset handover after final payment

Executive summary

This proposal covers the design, development, testing and launch support for a premium, custom food-delivery platform. The finished solution will be branded exclusively for the client and handed over with the source code, database access and administrative access after final payment.

This is not a rented annual marketplace service. The client will own the software and business assets, while optional future support can be requested whenever needed.

Included solution

- Customer mobile application for Android and iPhone: discovery, menus, cart, checkout, offers, notifications, order history, ratings and delivery-status tracking.
- Delivery-partner application: availability, order acceptance, pickup/delivery status, navigation handoff, earnings and delivery history.
- Restaurant dashboard: restaurant profile, menus, item availability, incoming orders, preparation status, order history and sales information.
- Admin dashboard: users, restaurants, delivery partners, orders, delivery zones, commissions, banners, coupons, reports and operational controls.
- Secure backend: database, login, APIs, role-based access, configuration, backups and integration-ready architecture.
- Custom UI/UX, logo, colour system, app icon, launch testing and Google Play / Apple App Store submission assistance.

Development budget

Deliverable	Amount (₹)
UI/UX, branding and application logo	80,000
Customer application — Android and iOS	2,80,000
Delivery-partner application	1,50,000
Restaurant partner and super-admin dashboards	1,10,000
Backend, database, APIs and authentication	2,00,000
Payments, Maps integration point, tracking and notifications	1,00,000
Testing, release support and complete source-code handover	80,000
TOTAL ONE-TIME DEVELOPMENT COST	10,00,000

Post-launch support and third-party costs

The project includes 60 days of post-launch bug-fix support. After this period, support and minor changes are charged only when requested.

Support item	Commercial terms
Post-launch bug-fix support	Included for 60 days
Support request / minor change after free period	₹15,000 per request
Major new feature or integration	Quoted separately after approval
Payment gateway, SMS/OTP, Maps, hosting and cloud usage	Client pays actual usage charges
Apple Developer and Google Play accounts	Client-owned accounts; fees paid directly by client

Delivery plan and payment schedule

Estimated delivery period: 20–24 weeks from confirmation, initial payment, and approval of the branding and required business information.

Milestone	Outcome	Amount (₹)
1	Project confirmation, planning and product discovery	2,00,000

2	Branding, UI/UX approval and customer-app development	2,50,000
3	Rider app, dashboards, backend and integrations	3,00,000
4	Testing, deployment and store-submission preparation	1,50,000
5	Final launch and complete handover	1,00,000

Assumptions and commercial terms

- The initial launch covers one primary city and standard food-delivery operations. Expansion to additional cities can be configured after launch.
- The client will provide business information, restaurant/menu content, legal documents, payment-gateway onboarding details and store-account credentials in a timely manner.
- Client-owned accounts will be used for payments, cloud hosting, Apple, Google, SMS/OTP and Maps services. This preserves ownership and avoids dependency on a third party.
- The client receives the custom source code, branding assets, database access and admin credentials after final development payment is received.
- Support covers issue diagnosis and agreed minor changes. Materially new features, redesigns, additional integrations or scope changes require a separate written estimate.
- Amounts exclude applicable GST and third-party usage charges.

Acceptance

Acceptance of this proposal confirms the scope, payment schedule and commercial terms stated above. Development begins after the first milestone payment and written approval to proceed.
